

First Batch of Honey from Dilosk / ICS Mortgages beehives at Killiane Castle

We have just taken delivery of the first batch of honey from our hives that we sponsor at Killiane Castle as part of our ESG initiatives.

Dilosk are proud sponsors of a number of beehives at Killiane Castle Honey as part of our ESG initiatives. The honey is produced using Irish Native bees by the Mernagh family who have been keeping bees for three generations.

Our core values have guided our ESG practices, which seek to drive growth and empower communities through our decision-making processes. In this way, Dilosk aims to meet its objective of being a mortgage provider in a sustainable infrastructure while having a positive influence on the sector in which it operates.
